

SafeHaven: Guiding You to Safety

Natural disasters are unpredictable. Your response shouldn't be.

Every year, millions are caught off-guard by hurricanes, floods, wildfires, and earthquakes—with devastating consequences. SafeHaven steps in as a real-time, location-aware emergency assistant, built to save lives with clarity, speed, and confidence.

Last decade stats

21

7M+

Acres Burned

Wildfires scorch vast lands yearly.

1000s

Earthquakes Strike

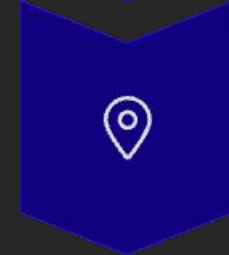

Thousands of tremors hit annually.

What SafeHaven Does

Detect Calamities

Uses NOAA, GDACS, USGS for data.

Pinpoint Location

Instantly via GPS or IP.

Recommend Safe Havens

Closest hotels and hospitals.

Provide Directions

Turn-by-turn out of danger.

Send Alerts

Updates and safety check-ins.

MVP

- **Uses historical disaster data to assess current location vulnerability**
- **Suggests optimal escape routes (away from danger zones)**
- **Maps safe zones using road networks + live conditions (optional)**
- **Lodging Locator**
- **Prioritizes places with positive reviews, accessibility features, and availability**
- **Emergency Resource Recommendations**
- **Recommends nearby support services: shelters, clinics, transportation hubs**
- **Leverages Google Maps and community reviews (via Nimble/Bright Initiative)**
